Questions	Answer
1. **Given the following code:** LectureCourse lecCourse = new LectureCourse("CS101", "Intro to Programming", "Dr. Smith", 3); System.out.println(lecCourse.calculateTotalWorkload()); What will be the output? a) 3 b) 14 c) 42 d) 17	C
2. **Given the following code:** LabCourse labCourse = new LabCourse("CS201", "Data Structures Lab", "Prof. Jones", 2.5, 2); System.out.println(labCourse.getCourseCode()); What will be the output? a) CS201 b) Data Structures Lab c) Prof. Jones d) 2.5	A
3. **What will be the output of the following code snippet?** LectureCourse lec1 = new LectureCourse("CS101", "Intro to Programming", "Dr. Smith", 3); LectureCourse lec2 = new LectureCourse("CS102", "OOP", "Prof. Lee", 4); System.out.println(lec2.calculateTotalWorkload()); a) 56 b) 42 c) 3 d) 4	A

4. **Given the following code, what is the expected output?** LabCourse lab1 = new LabCourse("CS201", "Data Structures Lab", "Prof. Jones", 2.5, 2); LabCourse lab2 = new LabCourse("CS202", "Algorithms Lab", "Dr. Brown", 2.0, 1); System.out.println(lab1.getCourseTitle()); a) CS201 b) Data Structures Lab c) Prof. Jones d) 2.5	B
5. **Considering the `LectureCourse` class, what would be the result of the following code?** LectureCourse lec = new LectureCourse("CS101", "Intro to Programming", "Dr. Smith", 3); lec.printCourseDetails(); a) A compilation error. b) A runtime error. c) The details of the lecture course will be printed to the console. d) Nothing will be printed.	C
6. **What is the primary difference between how a `LectureCourse` and a `LabCourse` calculate their total workload?** a) `LabCourse` uses hours per week * sessions, while `LectureCourse` uses hours per week. b) `LabCourse` uses a `double` for hours, while `LectureCourse` uses an `int`. c) `LectureCourse` uses weeks in a semester, while `LabCourse` does not. d) `LabCourse` does not have a `calculateTotalWorkload()` method.	A
7. **If we add a new type of course, `OnlineCourse`, which has `videoHours` and `quizCount` as attributes, what method from the `Course` interface would need to be implemented in a unique way for this new class?** a) `getCourseCode()` b) `getCourseTitle()` c) `calculateTotalWorkload()` d) `printCourseDetails()`	C
8. **What is the purpose of the `@Override` annotation used in the `LectureCourse` class?** a) It tells the compiler to ignore the method. b) It tells the compiler that this method is intended to override a method in a superclass or interface. c) It is required for all methods in an interface. d) It is used to define a new method.	B
